TOPICAL WORKSHOP ON ELECTRONICS  
FOR PARTICLE PHYSICS

Rethymno

Aquila Rithymna Beach,  
Crete, Greece

The workshop covers all aspects of electronic systems, components and instrumentation for particle and astro-particle physics such as: electronics for particle detection, triggering, data-acquisition systems, accelerator and beam instrumentation.

Operational experience in electronic systems and R&D in electronics for LHC, High Luminosity LHC, FAIR, neutrino facilities and other present or future accelerator projects are the major focus of the workshop.

Organized by the University of West Attica and National Technical University of Athens  
with the support from the European Organization for Nuclear Research (CERN)

UNIVERSITY OF  
WEST ATTICA

## Sponsoring Opportunities

- The **Topical Workshop on Electronics for Particle Physics (TWEPP)** is an annual international conference organized by **CERN**. Each year, it gathers 200–230 scientists and engineers from around the world to discuss the latest advancements in **electronic systems for high-energy physics, particle accelerators, and astrophysics**.
- In 2025, TWEPP will take place in Crete, Greece (Aquila Rithymna Beach Resort) from October 6–10, co-organized by UNIWA and NTUA.
